

**tourniquet "Dnipro"
Gen 2**

1.

1. New fastening of the belt
(easy removal and increased rigidity)

2.

2. Reinforced internal sling
(strong enough to not to break from twisting,
but it is easy to rotate the handle)

3.

3. External buckle lock
(fixes the buckle when tucking in the belt)

4.

4. Duralumin handle of a new shape
(comfortable and reliable in use, with tactical
gloves and without)

5.

5. Wide velcro on the platform with the cutout
(completely closes and securely holds the
collar, perforation allows you to quickly find it
even by touch)

6.

6. Lower fixation from the outer belt under
the platform
(does not interfere with the rotation of the
turnbuckle on the platform and reinforces the
platform underneath)

7.

7. Metal single-slot buckle
(convenient and quick belt filling)

8. Platform with six holes and softener
(reliable and flexible)

9. A soft base between the platform and the
buckle
(protects the skin and muscles of the limbs
between the buckle and the mold form from
pinching)

8.

9.
